Off-Campus Access to Library Resources

You will be prompted to login with your Ohio State Username (lastname.#).

This is different from any medical center login credentials you may have.

If you need to activate your Ohio State Username, a link is available on the right hand side of the login screen. For help with login or password issues contact 688-HELP or 8help@osu.edu.

Once you have successfully logged in, you will have access to library resources as if you were on campus.

Use links within the library web pages to maintain your connection to the off-campus access system. Using bookmarks or other links may disconnect your session.

Contact ejournals@osumc.edu with any questions access problems.
